

AMPLIFIER

The **AMPLIFIER** amplifies the light potential in matter and increases the oscillation frequency.

With the oblique side directed towards an object, it releases the light in this object and increases the oscillation quality.

It can be used for food, drinks, remedies, plants etc.

With the oblique side directed towards the body, the AMPLIFIER can be used for the energetic treatment of shock energies.

TECHNICAL DETAILS

Material: Glass

Size: 50 x 27 mm
