

AQUAFLOW

The **AQUAFLOW** revitalizes drinking water and also leads to beneficial reactions during showering and bathing. In addition, the water for the garden is vitalized, too, which benefits the plants.

- Pollutant information in water is harmonized energetically
- Most of the lime in the water is brought into suspension, resulting in less limescale deposits
- The taste of the water improves
- The oscillation frequency of the water increases.
- Greater flower splendor and improved plant growth.

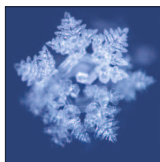

Simply coil around the main water pipe and fasten with the included cable ties.

The **AQUAFLOW MINI** is suitable for appartements, offices etc., equipped with water connection with hose (usually in the kitchen). It can be attached directly to the water hose.

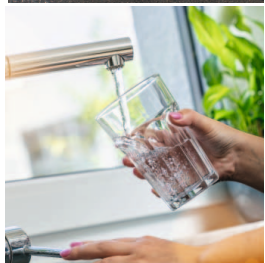

Water sample of a residential building in the area of Lucerne, which is supplied with seawater.

This picture shows an excerpt of the corresponding water samples.

After extraction of the original water, the **AQUAFLOW** was installed and one day after assembly a new crystal image analysis was made. This image shows the water crystal of the water vitalized by **FOSTAC®**.
