

HIMALAYAN CRYSTAL SALT COARSE

HIMALAYA CRYSTAL SALT COARSE

is a 100% pure, coarse-grained crystal salt from the Himalayas (Pakistan), mined by hand, energized with the FOSTAC® Technology. Free from chemical constituents.

This CRYSTAL SALT has an above-average content of minerals and trace elements. (Sodium chloride 97%.)

The CRYSTAL SALT is energized with the FOSTAC® Technology; thus, the minerals contained therein have the biologically positive original information of life, which is beneficial to our general well-being.

It is natural and of exceptional purity and quality. As a result, it also contains over 80 of the elements that are so important to the human body.

This coarse-grained CRYSTAL SALT is suitable for the salt mill in the kitchen or also very well as a bath additive for purification baths.

Application purification bath

- Approx. 1 kg of CRYSTAL SALT is required for a conventionally large bathtub (do not use any other bath additives)
- Water temperature approx. 37° Celsius
- Bath time approx. 20-30 minutes
- After bathing, do not shower off the skin, but only pat dry
- Rest for approx. 1/2 hour afterwards

Bathing in HIMALAYA CRYSTAL SALT supports the deacidification of the body and balances the ph-value of the skin. In addition, it has other positive influences on a number of ailments.

TECHNICAL DETAILS

Material: Pure crystal salt

Size: 1 kg
