

OMNI-RA

The **OMNI-RA** harmonizes conventional geopathic radiation (Water veins, faults etc.) as well as high radiation of electrosmog (also 5G radiation). For cumulative interference fields, additional products may be required.

It is well suited for office workplaces, individual sleeping places or when travelling.

For high electromagnetic pollution or directional beam loads, we recommend the additional use of a **SANA LEA OMNIGOLD** or **OCTARION/OCTARINO** and for all wireless devices the **FOSTAC OMNI CHIP** or the **ELECTRIC plate (Mini, A6 or A5)**. The negative effects of the internal power network can be harmonized with **Electric plates (A6, A5 or A4)**.

Used in the car, the OMNI-RA can harmonize the negative effects of the on-board computer electronics and increase the life energy (Chi) in the interior. For newer vehicles, such as hybrid and electric cars, additional products may be required.

This product must be safely secured to prevent from damage in case of a sudden breaking manoeuvre.

The personal sensitivity of the user is decisive when selecting the product. Our consultants are happy to assist you.

TECHNICAL DETAILS

Material: Glass

Size: 73 x 75 mm
