

OMNIUM PENDANT

OMNIUM comes from Latin and means: the entire.

The **OMNIUM PENDANT** was especially developed as a protective pendant for 5G radiation exposure. It has a positive influence on the effect of microwave radiation (up to and including 5G), general technical radiation, geopathic interference fields as well as other energetic interference fields.

It brings order to all levels of our being and increases our own light consciousness.

It leads to clarity on the level of body, mind and soul and creates a reconnection to the Divine Source, of which every living being is a part. By raising one's own frequency, lower frequencies (whether tech-

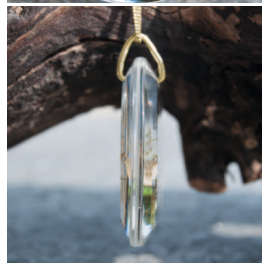

nical radiation or other energies) have little influence.

The OMNIUM pendant also protects when wearing headsets. However, the device connected to the headset should be additionally harmonized for this purpose.

The *International Society for Electromagnetic Research IGEF* certifies a demonstrable improvement in heart rate variability with the OMNIUM pendant

in the case of health stress caused by mobile radio, electromog and geopathic interference fields. It is suitable as a protective measure in case of electromagnetic radiation exposure and geopathic disturbance fields.

TECHNICAL DETAILS

Material: Glass

Size: Ø 35 mm
