

# PROPHYLAX

The **PROPHYLAX** protects against ectoparasites (ticks, fleas, mites) and other flying insects. It also has an impact on the energy centers of the body: chakras are re-activated, the meridian flow can be improved, the Chi can flow again, fears are diminished, and health is generally stabilized. In addition, it protects against possible negative effects of microwaves (cell phone, WLAN, mobile phones etc.), especially when micro-chips are implanted.

Sew on the collar or on the halter strap. Wearing it permanently is recommended, in order to maintain the built-up energy field around the clock. For smaller animals, fold the pendant in the middle at the notch and fix it with the ring.

The PROPHYLAX can also be worn by humans.

### **Efficacy:**

The PROPHYLAX is a special product that works interactively with the psyche of the user. A large-scale experiment showed, that these products have a statistically significant effect. There are, however, personal energetic circumstances in which the effect can be limited. The effect can best be seen in a human-animal relationship based on partnership and is limited for pet owners who want to control their animals or for whom subordination is important.

## **TECHNICAL DETAILS**

Material: Anodized aluminium  
Size: 23 x 43 mm,  
folded Ø 23 mm
